Introduction of the enhanced School Development and Accountability framework

- In the 2003/04 school year, the “School Development and Accountability (SDA) framework” was introduced to support schools to implement school-based management
- In the 2022/23 school year, implementation of the “enhanced SDA framework” was announced to bolster the accountability of staff in publicly-funded schools in providing quality school education, and enhancing the national education through adoption of a whole school approach
- For details, please refer to Education Bureau (EDB) Circular No. 15/2022

Major enhancement measures of the enhanced SDA framework

- Schools should focus more on the seven learning goals in conducting school self-evaluation (SSE). Together with the integrative use of Performance Indicators for Hong Kong Schools (PI), as well as SSE information and data, schools should holistically evaluate how good they are doing in nurturing the desired qualities in students
- Schools should collect annually the Key Performance Measures (KPM) data when conducting their year-end self-evaluation, report the data to Incorporated Management Committee/ School Management Committee and submit the data to the EDB
- Starting from the 2nd term of the 2023/24 school year, the EDB will upload the concluding chapter of the ESR reports of the respective school year to the EDB website for public information to enhance transparency and accountability
